

BARCODE STICKERS:

How to label your freight

Label your freight correctly to avoid shipment delays!

1. Use a new sheet for each shipment.
2. Apply a white sticker to the BOL.
3. Start at the top and apply the yellow stickers in order.
4. Apply **ONLY ONE STICKER** on each handling unit. Apply to a side, not top or bottom of unit.

WARNING: Using more than one sticker on a handling unit or applying stickers out of sequence will result in delivery delays.
5. If shipping less than eight handling units, throw out the unused stickers.
6. If you ship more than eight handling units, go to dayross.com/stickers for instructions.

! Damaged Sticker?
STOP! Start a new sticker sheet to relabel your freight in sequence.

ARE YOUR STICKERS UP TO DATE?
